The color chips on this card are reproduced as closely as possible to Concreation Color Hardeners and are to be used only as a guide. The actual appearance may vary with jobsite conditions, finishing techniques, use of sealers, release agents and slight raw material color drifts. Because of these differences, which Concreation cannot control, it is highly recommended that a jobsite mock-up sample be constructed for approval. Release agents for imprinted concrete are available in these colors and are intended as a surface highlighting product only and will not match color chart exactly.
